

OUR GREY IS YOUR NEW GREEN

INSUL-SHEATHING Panel

R5^{XP}

BP'S R-5^{XP} INSUL-SHEATHING PANELS
ARE NOW GREY, BUT GREENER THAN EVER

R-5^{XP} Insul-Sheathing panels are now available with DuPont's new reduced global warming potential **Styrofoam™ Brand XPS formulation**. This means that our already eco-friendly panels are now greener than ever — and still provide the same benefits that have made them so popular:

- **No additional bracing required**
- **Integrated air barrier**
- **Lightweight and easy to install**

To make them easy to identify, they are now grey instead of blue. That way, when you see our new GREY panels, you will know instantly that you are looking at a GREENER product.
